

NEW CONCEPTS MANAGEMENT SOLUTIONS

LEAN Six-Sigma Basics

Lean and Six-Sigma are both process improvement methodologies. Lean is about *speed* and *efficiency*. Six-Sigma is about *precision* and *accuracy*. Both are keys to a successful business strategy that focuses on the "needs of the customer."

Lean and Six-Sigma *thinking* supports the paradigms that effectively integrate people, processes and technologies into an overall system focused on reducing cycle time, eliminating waste and improving customer service.

Course Objectives

This one-day interactive workshop provides participants an overview of basic Lean Six-Sigma principles, terminology and concepts. Participants will learn why it is essential to "see the flow" of information and materials throughout the value stream (from suppliers to customers) and what steps are required to develop an implementation plan to effectively carry out the changes necessary to take a process from the present state to the future state.

The main objective of this training event is to *foster* Lean and Six-Sigma thinking.

Who Should Attend

Anyone who want to learn more about continuous improvement principles and methodologies in support of cost-savings initiatives, such as the Air Force Smart Operations for the 21st Century (AFSO21).

Workshop Goals

- Understand the methodology and tools used in the application of Lean and Six Sigma.
- Where to start - what it takes to put together a deployment plan and what the roadmap for deployment looks like.

Cost

\$325.00 per attendee
(Discounted Group Rates)

"Lean and Six Sigma Basics"

1-Day Training Event

{8:30am - 4:00pm}
